## Automobile Club (A)

This is the Automobile Club's car at Kinki University. In a race, this car makes a great contribution.

## Maintenance (B, C)

The engine is the power source of the car. No one can race if the engine has any trouble during the race.

To avoid this happening, the team has the car serviced in detail, especially the engine, carefully and quickly. To run fast in the race, these skills are also important.

## Running(D, E)

Kinki University's car runs quickly to make the best time. Where it runs, there are many curvy roads. However, it gets to the finish line without reducing speed. The point of the car is that it does not run wastefully and it goes a short course.

## Drift Racing(F, G, H)

If a regular driver faces a rapid and curvy course when they drive, they can decrease speed and turn into it. However, this driving technique does not make speed times quicker for a racecar driver. In this case, the professional drivers use the driving skill called 'drift'. In this skill a driver turns in the direction of the curve without decreasing speed, so it is possible to run quickly again out of the curve - like in these photos.
