授業到達目標の達成度	The speed of the lessons was very good but I would have liked to expand each lesson further but couldn't due to time constraints.						
反省点	I would like to have proceeded a little faster over the semester however due to the varied level within the class it wasn't possible. This class (Eigo II) is the same group as Mon period 3 (Eigo I). Giving the students the opportunity to study twice a week proved most beneficial to the majority of them, as can be seen by the overall results.						
来年度の計画	This will depend on the students taking the class but the textbook Smart Choice 2 together with the workbook is both interesting and level appropriate.						
授業評価アンケートに対するコメント	Most of the comments were very positive. According to the comments in the questionnaires most of the students did the set homework but little or no review or extension...they need to take more responsibility for their studies.
